

## Foreword

Coordination of Humanitarian Assistance (CHA) Organization is a not-for-profit, non-sectarian and non-political humanitarian organization that was created in 1987 by a team of educated and experienced Afghan volunteers.

At the moment, Coordination of Humanitarian Assistance (CHA) is providing and delivering humanitarian services in health, agriculture, education, community development, DRR, and engineering sectors.

CHA's health & Nutrition sector has been successfully managing Health & Nutrition projects, including implementation of BPHS and EPHS in different provinces of the country. Our programs are continuously strengthening, complementing, and supporting National Health Policies and strategies; CHA currently implementing the BPHS and PPP projects in Farah Province.

## Goal of the Health & Nutrition Sector

Assist in raising health and nutrition standards, and strengthening the health system through the provision of coordinated services of promotional, preventative and curative health care, as well as, activities that promote the health and living conditions in rural and urban areas, in accordance with community.

## Basic Package of Health services (BPHS)

Goal: To contribute in reducing maternal and new born mortality rate

(ii) Reduce rate of (under 5) child mortality, improve child health and nutrition by the delivery of BPHS in the entire Farah province.

Through the implementation of the Basic package of health Services (BPHS), and Public Private Partnership (PPP), under stewardship of MoPH, CHA can provide health services to over 512599 people including 102520 child-bearing aged women, and 256210 (under 5) children of the Farah province.

### Specific Objectives:

To increase access and the utilization to improved quality of primary health care services, in an equitable and sustainable manner.

To increase the proportion of women and children having access to emergency and routine Reproductive Health (RH); Maternal, Neonatal, and Child Health (MNCH) Care; and immunization Services.

To increase access and the utilization of quality promotional, preventative and curative mental health services, including case identification and referral treatment, psychosocial counselling, and social integration.

To increase access and the utilization of quality promotional, preventative and curative disability and physical rehabilitation services, including case identification, referral, and physical rehabilitation of disables.

To increase the coverage of services, to prevent and treat transmittable diseases (TB, HIV/AIDS and Malaria).

To build the capacity of the health staff working in the province for the delivery of BPHS, and provide pre-services training for community midwives and nurses, to address the shortage of health workers at health facilities.

## Pulic Private Partnership (ppp)

CSO type B or Public private partnership Project has been implementing in 3 districts, including Bakwa, Gulistan and Purchaman of the Farah province.

Goal :To improve accessibility to quality health services, especially EPI and Basic Reproductive Health services in Gulistan, Bakwa and Purchaman districts (being the most insecure and remote areas), through strengthening the use of the existing private sector.
